The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Adrienne L. Lustig

I think that there has been too much deregulation not only of phone service but the whole broadcast media. I am totally against leaving **us** at the mercy of big business tycoons who care only for their own pocket books and not one whit for **us** poor consumers.

Sincerely,

Arthur Mathiasen

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I have had a terrible time with SBC after they billed me for a service that had been discontinued for several months. They realized their mistake but kept telling me that it would take two to three months to get it resolved. In the mean time I was harassed by the bill collectors to pay the bill. I kept calling SBC and they kept telling me that they would take care of the problem. This lasted four months. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service. If SBC is given free reimbursement on consumers, there will be no stopping them.

Sincerely,

Barbara Newton
